RE: Support for Broadway Ave Complete Streets Corridor

Dear Active Transportation Program Selection Committee:

The City of Seaside supports the Broadway Ave Complete Streets Corridor grant application proposal. The project will build on the recently completed West Broadway Urban Village development funded through the Active Transportation Program in Cycle 2 to provide a continuous and safe corridor for bicyclists and pedestrians connecting residents to jobs and shopping on the west end and schools and affordable housing for families and seniors on the east end. The corresponding education and encouragement programming will be crucial to encourage and increase safe bicycling and walking and prevent unsafe behaviors that currently account for the high pedestrian and bicyclist collision rates involving children in our community. This programming will help the City ensure that all students and parents are provided with the opportunity to learn and practice safe walking and biking skills and habits in a safe environment, reduce the amount of traffic surrounding schools, increase the number of students walking, biking and carpooling to school and improve the health of children in Seaside.

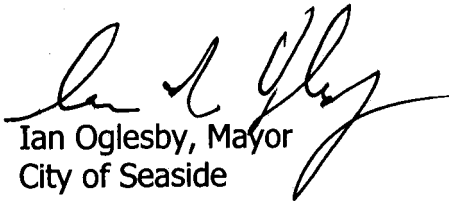

The City adopted the Seaside & Marina Safe Walking & Biking to School: Complete Streets Plan in February 2020. The Plan identifies Broadway Avenue and Yosemite Avenue as important safe routes to school corridors serving four of the seven elementary schools in Seaside. Consistent with the Plan, the Broadway Ave Complete Streets Corridor will address the top community-identified safety concerns and barriers to children walking and biking to schools in the project area: safety of intersections and crossings; speed of traffic and amount of traffic. These community concerns are validated by the history of bicycle and pedestrian involved collisions on Broadway Avenue. Over the past decade, 13.5% of all bicycle and pedestrian collisions in Seaside occurred within the project area.

Our residents also have health struggles that could be helped by increased walking and bicycling especially for our children and African American community. In 2018, nearly half of all 5th graders in Seaside were overweight or obese. Our African American community is the

largest in Monterey County, and disproportionately affected by heart disease, diabetes, and obesity. We need more places in our city where people can feel safe and comfortable walking and bicycling and programming to help start the movement. The Broadway Ave Complete Streets Corridor project will be a huge step in the right direction.

The City of Seaside supports this important active transportation project and education program and asks that you approve the grant request. Thank you for your consideration of this project.

Sincerely,

Ian Oglesby, Mayor
City of Seaside

RE: Support for Broadway Ave Complete Streets Corridor

Dear Active Transportation Program Selection Committee:

The Greater Victory Temple Church of God in Christ supports the **Broadway Ave Complete Corridor** proposal. This program will encourage and increase safe bicycling and walking and prevent collisions involving children in our community. We have elderly residents that would love to have the opportunity to increase their walking ability in a safe environment.

Our African American community is the largest in Monterey County and is affected by heart disease, diabetes, and obesity. We have such a great need for more places in our city where people can feel safe and comfortable walking and bicycling. The Broadway avenue Complete Streets Corridor project will be a huge step in the right direction.

RE: Support for Broadway Ave Complete Streets Corridor

Dear Active Transportation Program Selection Committee:

Monterey-Salinas Transit (MST) supports the **Broadway Ave Complete Streets Corridor** grant application proposal. MST is the sole public transit provider in the project area. A number of transit lines extend along the Broadway Ave corridor, a heavy transit usage area. The project will improve the first/last mile experience for many of our users.

The project will build on the recently completed West Broadway Urban Village development funded through the Active Transportation Program to provide a continuous and safe corridor for bicyclists and pedestrians connecting residents to jobs and shopping on the west end and schools and affordable housing for families and seniors on the east end. The corresponding education and encouragement programming will be crucial to encourage and increase safe bicycling and walking and prevent unsafe behaviors that currently account for the high pedestrian and bicyclist collision rates involving children in our community. This programming will help ensure that all students and parents are provided with the opportunity to learn and practice safe walking and biking skills and habits in a safe environment, reduce the amount of traffic surrounding schools, increase the number of students walking, biking and carpooling to school and improve the health of children in Seaside.

The City adopted the Seaside & Marina Safe Walking & Biking to School: Complete Streets Plan in February 2020. RE: Support for Broadway Ave Complete Streets Corridor

Dear Active Transportation Program Selection Committee:

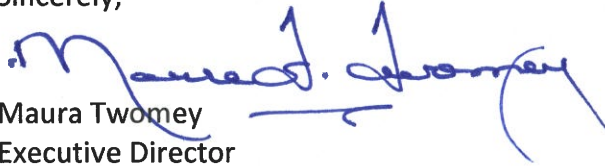

I am writing on behalf of the Association of Monterey Bay Area Governments (AMBAG) to express support for the Broadway Ave Complete Streets Corridor Active Transportation Program grant application. This project supports AMBAG's adopted 2040 Metropolitan Transportation Plan/Sustainable Communities Strategy (MTP/SCS) that serves as a blueprint for the long-range development of the region's transportation system by "improving connectivity and access to common destinations, such as connections between residential areas and school".

The project will build on the recently completed West Broadway Urban Village development, funded through the Active Transportation Program, to provide a continuous and safe corridor for bicyclists and pedestrians connecting residents to jobs and shopping on the west end and schools and affordable housing for families and seniors on the east end. The corresponding education and encouragement programming will encourage and increase safe bicycling and walking and prevent unsafe behaviors that currently account for the high pedestrian and bicyclist collision rates involving children in our community. This programming will help ensure that students and parents are provided with the opportunity to learn and practice safe walking and biking skills and habits in a safe environment, reduce the amount of traffic surrounding schools, and increase the number of students walking, biking and carpooling to school in Seaside. The project will provide safer bicycling and walking facilities to reduce our region's greenhouse gas emissions, improve our community's health and enhance quality of life.

Through the project's connection to regional multimodal routes, bus rapid transit, the Fort Ord Regional Trail and Greenway, and Monterey Bay Sanctuary Scenic Trail, it will provide better opportunities for Seaside residents to access jobs, the natural environment, and places of higher learning.

This project supports the implementation of strategies found in AMBAG's 2040 MTP/SCS by reducing congestion, reducing greenhouse gas emissions, improving equitable access to the transportation system, and improving safety of the multimodal transportation network. AMBAG supports this important regional active transportation project and recommends approval of this grant request. Thank you for your consideration of this project.

RE: Support for Broadway Ave Complete Streets Corridor

Dear Active Transportation Program Selection Committee:

The Monterey County Health Department (MCHD) supports the **Broadway Ave Complete Streets Corridor** grant application proposal. The project will build on the recently completed West Broadway Urban Village development funded through the Active Transportation Program to provide a continuous and safe corridor for bicyclists and pedestrians connecting residents to jobs and affordable housing for families and seniors. MCHD is committed to partnering in the corresponding education and encouragement programming that is crucial to help residents increase safe bicycling and walking, in communities that have higher rates of chronic disease. This programming will help ensure that all students, parents, and seniors are provided with the opportunity to learn and practice safe walking and biking skills in a safe environment and will support improved health outcomes for the residents of Seaside. MCHD has been promoting active transportation for over 20 years and is recognized for the success of our innovative health equity approaches and programs. In addition, we will continue to ensure communities are involved in improving resident awareness of the benefits of and help guide increased walking and biking to school and other community social sites in a safe manner.

MCHD supports this important active transportation project and education program and asks that you approve the grant request. Thank you for your consideration of this project.

With support from the Active Transportation Program (ATP) Cycle 5 grant we will be able to make an impact in this community. We look forward to partnering with TAMC on this project.

Sincerely,
